

MD. SHEIKH SAYED

Full-Stack Developer

📞 (+88)01743020369 @ sheikhsayed23@gmail.com 🔗 sheikh-sayed.onrender.com

EXPERIENCE

Backend Developer (Contract)

Bugsbee

📅 09/2024 - 03/2025 📍 Remote

- Developed and maintained RESTful APIs using Django and Django REST Framework for client applications
- Implemented role-based authentication and JWT token system for secure user access
- Optimized database queries and models to improve performance using PostgreSQL
- Participated in code reviews, debugging, and documentation to ensure clean, scalable backend code
- Assisted in deploying backend services on VPS/Linux servers and managing environment configuration

Full Stack Developer (Intern)

Maxwell Stamp Ltd

📅 11/2025 - 02/2026 📍 Onsite

- Project Portal making for the company
- Implemented role-based authentication and JWT token system for secure user access
- Optimized database queries and models to improve performance using Appsheet, Supabase
- Participated in code reviews, debugging, and documentation to ensure clean, scalable backend code

PROJECTS

Taskhub – Micro Task Management Platform

- Role-Based Access Control: Separate dashboards and functionalities for Admins and Employees
- Asset Management (Admin): Admins can add, update, and delete assets, categorizing them as "Returnable" or "Non-returnable."
- Payment Integration: Integrated Stripe payment system for Admins to purchase subscription packages and increase their member limit
- Real-time Notifications: Success and error handling using SweetAlert2 and React Hot Toast
- Search and Filtering: Advanced filtering options for assets based on availability, type (Returnable/Non-returnable), and search by name
- Technologies: React.js, Express.js, Node.js, MongoDB, JWT Authentication

Stylehub – E-Commerce site | Full Stack Development

- Without login customer can buy clothes from store
- Asset Management (Admin): Admins can add, update, and delete products
- Payment Integration: Integrated Sslcommerz payment system for buying clothes
- Search and Filtering: Advanced filtering options for assets based on availability and search by name
- Technologies: React.js, Django Rest Framework, MySQL, JWT Authentication

SUMMARY

Full-Stack Developer skilled in Django and React, focused on building scalable and innovative web applications

EDUCATION

B.Sc. in Honors in Computer Science and Engineering

Bangladesh University of Business and Technology

📍 Dhaka

• Ongoing

HSC in Science

Government Pallabi College

SSC in Science

Mirpur Bangla High School

SKILLS

Technical Skills

Languages Python

JavaScript (ES6+) C C++

Web Frameworks Django

Django REST Framework (DRF)

React.js Frontend HTML5

CSS3 Modern UI/UX Principles

Tools & Technologies RESTful APIs

Version Control (Git)

Professional Competencies

Leadership Collaboration

Efficiency Creative Problem Solving

Time Management

PROJECTS

CareerSwift – Online Job Portal site | Full Stack Development

- Dynamic Title/Metadata: The website title changes dynamically based on the route
- Secure Routing: Implementation of Private Routes to protect specific pages (like Add Job or Applied Jobs) from unauthorized users
- PDF Generation: Users can download a summary or details of their applications in PDF format (likely using react-to-pdf)
- User Authentication: Secure login and registration using Firebase Authentication, including support for Email/Password and Google Social Login
- Technologies: Django, MySQL, JWT Authentication
